- People Skill

LANGUAGES

English

Mandarin

ABOUT ME

I am a passionate junior full stack developer, love to create cool things and interested in improving user's experience.

I started learning programming on my own while working and earned an IT diploma with a focus on web development. Now, I've returned to university, eager to dive deeper into software development.

I see myself as a life time learner, I deeply believe learning will lead me to a better human being.

My dream is to use technology to benefit humanity, and I hope to be involved in some really cool creations.

Kindly view my personal portfolios: <https://jeffrey-r-fullstack.netlify.app/>
