- UI libraries (Bootstrap, Shadcn, etc.)
- APIs (Leaflet; Firebase; OSRM API etc.)
- AI tools (StableDiffusion, SunoAI etc.)

LANGUAGES

- Mandarin
- English

ABOUT ME

I'm a junior full-stack developer with a strong passion for software, game, and web development. I started programming independently while working, and later returned to university to deepen my technical skills.

I'm dedicated to writing clean, maintainable code and enjoy contributing to projects that focus on real-world impact and good user experience. I also bring strengths in project organisation, time management, and long-term code maintenance.

I see development as a lifelong learning journey, and I'm excited to apply my skills in meaningful, creative, and collaborative environments.

Kindly view my personal portfolios: <https://jeffrey-r-fullstack.netlify.app/>
