## Full stack Developer

I am a junior full stack developer with a certified expertise in web development, and after self-exploration, I have discovered my interest and passion is web development.

My tech stack includes HTML, CSS, JavaScript, and React frameworks, Node.js and NoSQL database.  
Familiar with PHP and SQL database.

I have been uploading my work on GitHub, and I am continuously working towards becoming a professional full-stack developer.

I had multiple roles for past few years, a business owner, a young dad and a student. I never stopped self-developing and currently seeking for a new start.

Looking forward to have an opportunity will allow me to work with / learn from experienced professionals and contribute to the development of high-performance website applications.
