Language

English

Mandarin

I am a junior full stack developer.
My current tech stack includes **HTML, CSS, JavaScript/TypeScript**, and **React** frameworks, **Node.js** and **NoSQL** database. Familiar with **PHP** and **SQL** database.

Kindly view my portfolio of projects on my personal page :
https://jeffrey-r-fullstack.netlify.app/

I never stopped self-developing and currently seeking for a new start, and I am willing to learn any frameworks/engines as needed.

I have been uploading my work on GitHub, and I am continuously working towards becoming a professional full-stack developer.

Looking forward to have an opportunity that will allow me to work with experienced professionals and contribute to the development of high-performance website and applications.
